John H. Hubbard, Beverly H. West

Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) (Pt. 2) John H. Hubbard, Beverly H. West

This is a continuation of the subject matter discussed in the first book, with an emphasis on systems of ordinary differential equations and will be most appropriate for upper level undergraduate and graduate students in the fields of mathematics, engineering, and applied mathematics, as well as in the life sciences, physics, and economics.

After an introduction, there follow chapters on systems of differential equations, of linear differential equations, and of nonlinear differential equations. The book continues with structural stability, bifurcations, and an appendix on linear algebra. The whole is rounded off with an appendix containing important theorems from parts I and II, as well as answers to selected problems.

From reader reviews:

Cindy Searcy:

Typically the book Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) (Pt. 2) has a lot associated with on it. So when you check out this book you can get a lot of help. The book was published by the very famous author. Mcdougal makes some research before write this book. This book very easy to read you can obtain the point easily after reading this book.

Charles Lemaster:

Do you have something that you want such as book? The reserve lovers usually prefer to select book like comic, small story and the biggest the first is novel. Now, why not striving Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) (Pt. 2) that give your fun preference will be satisfied through reading this book. Reading habit all over the world can be said as the way for people to know world far better then how they react towards the world. It can't be stated constantly that reading practice only for the geeky individual but for all of you who wants to end up being success person. So , for all of you who want to start studying as your good habit, you may pick Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) (Pt. 2) become your own starter.

Leona Ferretti:

This Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) (Pt. 2) is fresh way for you who has fascination to look for some information since it relief your hunger of information. Getting deeper you on it getting knowledge more you know or you who still having bit of digest in reading this Differential Equations: A Dynamical Systems Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) (Pt. 2) can be the light food for you because the information inside this kind of book is easy to get by simply anyone. These books develop itself in the form and that is reachable by anyone, yes I mean in the e-book type. People who think that in e-book form make them feel drowsy even dizzy this reserve is the answer. So there is not any in reading a book especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss it! Just read this e-book type for your better life as well as knowledge.

Lawanda Beverly:

What is your hobby? Have you heard this question when you got students? We believe that that problem was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person like reading or as studying become their hobby. You need to understand that reading is very important and also book as to be the factor. Book is important thing to add you knowledge, except your own teacher or lecturer. You see good news or update concerning something by book. Amount types of books that can you take to be your object. One of them is Differential Equations: A Dynamical Systems

Approach: Higher-Dimensional Systems (Texts in Applied Mathematics) (Pt. 2).
