NURSING ASSESSMENT IN THE CLINICAL SETTING – VOLUME 4
THE IMMUNE SYSTEM

General overview of the Immune System

The Immune System has a tremendous amount of work to do.

It works in conjunction with the Lymphatic System to protect the body from organisms that can cause infection.

A strong Immune System is an essential survival tool.

However, the Immune System may be weakened in more ways than one.

Stress may take its toll on the Immune System.

Autoimmune diseases also have a major impact on the Immune System. This group of illnesses is discussed in detail, as they cannot be overlooked.

The Immune System is presented in a colorful, compact book with emphasis on the importance of a strong Immune System and how the nurse can be part of the solution and not the problem.

This book is the fourth (Volume 4) in the series. It is put together by a Registered Nurse with decades of experience in Advanced Healthcare Facilities.

The information is provided in a simple and nurse friendly way.

Volume 4 covers Assessment of the Immune System.

This is intended to improve learning about the Immune System and conditions that may affect it.

It must be remembered that although the information provided is current, medical information is constantly changing.

Always follow your Institution's Policies and Procedures and MD orders.
