## **Mind and Reality: The Space-Time Window** Wolfram Schommers

The relationship between mind and reality is usually perceived as an event that takes place in reality and producing simultaneously an internal image in the mind. So it takes place twice, so to speak, and there is a one-to-one correspondence between the two events. Within this conception, matter is embedded in space and time, and can be designated as “container-principle”. This monograph emphasizes that the well-known philosopher Immanuel Kant denied this principle and he stated that reality is principally not recognizable to a human being, and modern biological evolution seems to lead exactly to Kant's point of view. Within the theory of evolution, man's image about reality in mind does not have to be complete and true in the sense of a precise reproduction, and it is relatively easy to recognize that even space and time should not be elements of reality outside. Within this conception, only a certain part of reality, which the human being needs for mastering life, is projected onto space and time, and we come to the so-called “projection principle”. Then, spacetime defines the window to reality, leading to a number of exciting and essential questions, some of which are discussed in this monograph. As is known, current physics is mainly based on the container-principle. But this monograph proposes that the projection principle is obviously more suitable and could help to solve open-ended questions as, for example, in connection with the nature of time, the particle-wave duality, the cosmological constant, etc. Regarding the statistical behavior of matter, Einstein's statement “God does not play dice” has to be seen in a new light, but also Feynman's general viewpoint on quantum theory that it cannot be understood by man. However, conventional quantum theory is obviously not a consistent framework as per the projection principle. The term “world equation” is critically probed in this monograph.

### From reader reviews:

#### **Peter Clark:**

The book Mind and Reality: The Space-Time Window make one feel enjoy for your spare time. You can utilize to make your capable far more increase. Book can to become your best friend when you getting stress or having big problem with your subject. If you can make reading through a book Mind and Reality: The Space-Time Window to be your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. You may know everything if you like wide open and read a e-book Mind and Reality: The Space-Time Window. Kinds of book are several. It means that, science guide or encyclopedia or other folks. So , how do you think about this publication?

#### **Anna Thompson:**

The actual book Mind and Reality: The Space-Time Window will bring someone to the new experience of reading any book. The author style to describe the idea is very unique. In case you try to find new book to see, this book very appropriate to you. The book Mind and Reality: The Space-Time Window is much recommended to you to see. You can also get the e-book from official web site, so you can easier to read the book.

#### **Brett Nash:**

The e-book untitled Mind and Reality: The Space-Time Window is the book that recommended to you to see. You can see the quality of the book content that will be shown to a person. The language that author use to explained their way of doing something is easily to understand. The writer was did a lot of research when write the book, so the information that they share to you personally is absolutely accurate. You also can get the e-book of Mind and Reality: The Space-Time Window from the publisher to make you considerably more enjoy free time.

#### **Virginia Kang:**

What is your hobby? Have you heard which question when you got scholars? We believe that that problem was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And you also know that little person just like reading or as reading become their hobby. You must know that reading is very important in addition to book as to be the thing. Book is important thing to include you knowledge, except your teacher or lecturer. You see good news or update in relation to something by book. A substantial number of sorts of books that can you take to be your object. One of them is Mind and Reality: The Space-Time Window.
