Curriculum: Alternative Approaches, Ongoing Issues (3rd Edition) Colin J. Marsh, George Willis

This compact, scholarly book treats creating a curriculum as an ongoing *process*, the product of which is a composite of what is intended (planned curriculum), what actually happens (enacted curriculum), and how what happens influences those involved (experienced curriculum). It proposes that desirable educational experiences arise when the interaction of these three curricula is flexible and evolving; and, therefore, the authors never advance specific, “best” practices or “most correct” answers to fundamental curriculum questions. Rather, through a finely honed discussion of essential theoretical and practical alternatives, they invite readers to develop their own points of view. Major discussions of postmodernism, autobiographical techniques, gender, and race. The book also includes coverage of recent actions by state governing agencies and boards of education and aligning curriculum with state standards. For professionals in the field of teaching.
