## **Theory & Design of Air Cushion Craft** Liang Yun, Alan Bliault

This definitive text describes the theory and design both of Air Cushion Vehicles (ACV) and Surface Effect Ships (SES). It begins by introducing hovercraft types and their development and application throughout the world in the last three decades, before going on to discuss the theoretical aspects of ACV and SES craft covering their hovering performance, dynamic trim over calm water, resistance, stability, manoeuvrability, skirt configuration and analysis of forces acting on the skirts, ACV and SES seakeeping, and the methodology of scaling aerodynamic and hydrodynamic forces acting on the ACV/SES from model test data.

The latter chapters describe a design methodology, including design criteria and standard methods for estimating craft performance, lift system design, skirt design, hull structure, propulsion systems and power unit selection. Much technical information, data, and references to further work on hovercraft and SES design is provided. The book will be a useful reference to engineers, technicians, teachers, students (both undergraduate and postgraduate), operators etc. who are involved in ACV/SES research, design, construction and operation.

Guides the reader on how to perform machinery and systems selection within ACV and SES overall design  
For teachers, students (both at under- and post-graduate level), engineers and technicians involved in ACV/SES

### **From reader reviews:**

#### **Renee Oneal:**

Book will be written, printed, or descriptive for everything. You can know everything you want by a publication. Book has a different type. As it is known to us that book is important issue to bring us around the world. Next to that you can your reading ability was fluently. A publication Theory & Design of Air Cushion Craft will make you to end up being smarter. You can feel much more confidence if you can know about every thing. But some of you think that open or reading any book make you bored. It is far from make you fun. Why they might be thought like that? Have you searching for best book or acceptable book with you?

#### **Franklin Richter:**

Do you certainly one of people who can't read gratifying if the sentence chained in the straightway, hold on guys that aren't like that. This Theory & Design of Air Cushion Craft book is readable through you who hate the straight word style. You will find the data here are arrange for enjoyable looking at experience without leaving possibly decrease the knowledge that want to provide to you. The writer associated with Theory & Design of Air Cushion Craft content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the content but it just different as it. So , do you continue to thinking Theory & Design of Air Cushion Craft is not loveable to be your top collection reading book?

#### **Morris Sampson:**

Reading a book can be one of a lot of activity that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new info. When you read a publication you will get new information because book is one of many ways to share the information or maybe their idea. Second, studying a book will make an individual more imaginative. When you studying a book especially fictional book the author will bring you to definitely imagine the story how the personas do it anything. Third, you are able to share your knowledge to other folks. When you read this Theory & Design of Air Cushion Craft, it is possible to tells your family, friends and soon about yours publication. Your knowledge can inspire the others, make them reading a guide.

#### **Anna Hart:**

That publication can make you to feel relax. This kind of book Theory & Design of Air Cushion Craft was vibrant and of course has pictures on the website. As we know that book Theory & Design of Air Cushion Craft has many kinds or style. Start from kids until adolescents. For example Naruto or Detective Conan you can read and believe that you are the character on there. Therefore not at all of book usually are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading in which.
