Ecografia in oncologia: Testo-Atlante di ultrasonologia diagnostica e interventistica dei tumori (Italian Edition) Orlando Catalano, Alfredo Siani

Questo volume offre un'informazione dettagliata sulle applicazioni chiave delle diverse tecniche ecografiche allo studio dei tumori. Viene fornito il background necessario sui maggiori problemi dell'oncologia clinica: screening, identificazione, caratterizzazione e stadiazione delle neoplasie maligne, valutazione della risposta terapeutica, follow-up. Vengono accuratamente discussi la tecnica d'esame ed i principi interpretativi di tutte le tecniche ultrasonografiche (ecografia in scala dei grigi, color-Doppler, Doppler pulsato, power-Doppler, ecocontrastografia), con particolare attenzione agli aspetti pratici, ai "trucchi del mestiere" ed ai potenziali trabocchetti metodologici e semeiologici. Un'enfasi particolare è posta su quelle aree dove l'ecografia svolge un ruolo determinante rispetto alle altre metodiche di diagnostica per immagini, con un approccio pratico e originale, per "problematiche cliniche". Le principali procedure eointerventistiche, diagnostiche e terapeutiche, vengono illustrate in dettaglio. La ricchissima iconografia, comprendente anche un CD-ROM con video originali, integra puntualmente il testo. Un'opera compatta ed omogenea, necessaria per tutti i medici, sia radiologi che non radiologi, che si occupano di ecografia.
