Malignant Lymphomas (Atlas of Clinical Oncology.) (American Cancer Society Atlas of Clinical Oncology) Michael L. Grossbard MD

Malignant Lymphomas is a volume in the acclaimed American Cancer Society Atlas of Clinical Oncology series. Dr. Grossbard and his team have summarized current knowledge on the pathology, epidemiology, molecular biology, presentation and management of patients with both non-Hodgkin's lymphoma and Hodgkin's disease. The experts address the disease group by type - indolent B-cell lymphoma, diffuse large cell lymphomas, Burkitt's/high-grade non-Hodgkin's lymphoma - as well as the key therapies of chemotherapy, monoclonal antibody, radiation, vaccine, hematopoietic stem cell transplants and more. This text's multi-author approach is a necessity now that management and classification of lymphoma have grown so complex. Malignant Lymphomas will be a valuable resource in the practice of those seeing patients with the disease, as well as a springboard for the continued inquiry into advances being made into the pathophysiology, diagnosis and management of lymphoma.
